FITTING NOTES Converter stall speed should be equal to or greater than the minimum rpm of the cam power range.

1. Must use performance springs
2. Must use performance retainers
3. Machining required to fit these components
4. Must use performance seal
5. Notes 1 to 4 all apply to this part number.
6. Check valve train geometry before ordering pushrod.

Custom ground Camshafts

PART NO.	DESCRIPTION
5900	Custom ground billet using one master Solid or Hydraulic.
5950	Custom profile roller cam ground on induction hardened steel billet.

NOTE For to suit EFI engines and engines fitted with EFI heads, see page 35, for Camshaft and Memcal kits see page 34.
