

## LS1 Camshaft and Computer Packages

The integrated approach to LS1 street performance with each package containing specifically designed hi performance roller camshafts, PCM tune to suit each profile and matching performance valve springs. The tune is programmed into your original PCM unit which is returned to Crow Cams using a pre-paid air freight box included when you purchase the kit.

Tuning focuses on developing excellent mid range power and torque combined with outstanding driveability.

The package works best when combined with performance headers and twin cat exhaust system.

### ***Please NOTE***

***These packages are not suitable for HSV Vehicles***

## Stage Two – Street Performance Part Number CCKLS1320

Performance street camshaft, valve springs and computer program. Delivers strong gains in mid range power and torque with excellent every-day drive ability. Increases in power of greater than 40% have been achieved when package is combined with efficient performance exhaust system.
